

Some Facts

It is estimated that at least two out of every ten girls and one out of every ten boys are sexually abused by the end of their 13th year. To protect all children, we first need to learn the facts.

Did you know that most children who are sexually abused, are abused by a family member or close friend? Did you know that "stranger danger," by comparison, is quite rare?

Your Opportunity To Save Children

If you are an ordinary person in an ordinary family, you have the most power of anybody to save the children around you. Every time you tell your sister or your husband or your friend a fact about what causes child molestation, every time you tell them what we can do now to stop it, you build a stronger safety net for every child.

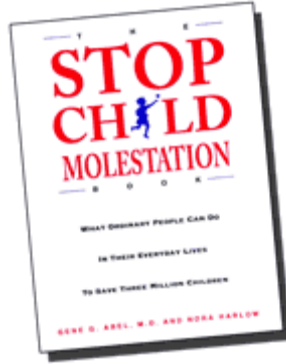

To begin learning the facts, start with the [CMRPI Prevention Plan](#). This plan was developed from the findings of the Child Molestation Prevention Study by Gene G. Abel, M.D. and Nora Harlow.

Child sexual abuse is scary, but you don't have to feel powerless. This website is dedicated to showing you the specific steps you can take to protect your children and all of the children in your community.

Child Sexual Abuse Survey

This survey is anonymous and takes about 10 minutes. With your participation, we hope to gain information vital in our fight to protect children from sexual abuse.
